

Electric Forklift Program

POWER UP WITH CASH INCENTIVES

Electric forklifts have lower operating costs, less emissions, less maintenance, and quieter operation. Tennessee Valley Authority (TVA) incentivizes the replacement of internal combustion forklifts to electric powered forklifts. Incentives are available for a limited time for the replacement of internal combustion forklifts with electric powered forklifts. You can receive \$2,000 per replaced forklift when you make the switch.

What is the Electric Forklift Program?

TVA's EnergyRight[®] Solutions Electric Forklift Program will provide a \$2,000 per forklift incentive to replace internal combustion Class 4 (cushion tire) and Class 5 (pneumatic tire) forklifts to electric-powered Class 1 (counterbalance) or Class 2 (narrow aisle) forklifts.

Are You Eligible?

All TVA Local Power Company (LPC) customers, Directly-Served Industrial (DSI) customers and LPC-served end-use customers are eligible. The following qualifying criteria apply:

- You must replace your existing Class 4 or Class 5 forklift with the purchase or lease of a new Class 1 or Class 2 forklift.
- The internal combustion forklift must be discontinued from use at participant site.
- The new electric forklift must remain operational at the site for at least five years.

Get Started Today!

- Electric Forklift Program Vendors are trained to help you complete and submit the incentive application.
- Find a Vendor today by visiting EnergyRight.com.
- Planning to submit the application yourself? Visit EnergyRight.com to download the application.
